

PRASHANT KUMAR SINHA

QA Architect (Senior Staff Engineer)

Phone No: +91-8971191121

Email Id: prashantsinha789@gmail.com

Address: Bengaluru, India

Linkedin: <https://www.linkedin.com/in/prashant-sinha-qa-architect/>

Date of Birth: 07-08-1991

Dedicated QA Architect with a passion for ensuring software excellence and a proven track record in the computer software/engineering industry. My career is marked by a commitment to crafting robust automation strategies that align with organizational goals, delivering quality products that exceed user expectations. Adept in navigating the complexities of Quality Assurance, I thrive in fast-paced environments where innovation and continuous improvement are at the forefront. Seeking a role where I can leverage my extensive experience to drive quality initiatives and contribute to the success of a dynamic team.

Professional Summary

- Over 10 years of professional expertise in Quality Assurance, focusing on automation and manual testing within the IT industry.
- Successfully led and developed high-performing QA teams, with direct management of up to 4 direct and 13 indirect team members.
- Designed and implemented automation frameworks using technologies such as Cypress, Playwright, JavaScript, and TypeScript, resulting in up to 90% increase in test case coverage.
- Championed Agile (Scrum) methodologies, contributing to the timely delivery of high-quality products and a reduction in critical production bugs.
- Expertise in diverse testing techniques including Black Box, UAT, API, and Performance Test Monitoring.
- Developed E2E test suites and integrated testing solutions into CI/CD pipelines, showcasing a commitment to thorough QA processes.
- Hands-on experience with API automation and validation using Axios and Postman, along with performance testing using Artillery and slight exposure to JMeter.
- Managed cross-functional collaborations, effectively communicating with developers and stakeholders to negotiate and resolve issues.
- Technical proficiency in tools such as Postman, Maven, Selenium, KNIME Workflow, and the latest automation/testing technologies aligned with industry best practices.

Work Experience

Oct 2024 - Present

Senior Staff Engineer

Altimetrik India Pvt Ltd (Bengaluru)

Lead the design, development, and integration of scalable Playwright-based automation frameworks, API validations, and performance testing into CI/CD pipelines for enterprise-scale applications.

- Designed and developed a scalable Playwright automation framework from scratch for large-scale e-commerce platforms, leveraging the Facade design pattern and Page Object Model (POM) architecture.
- Built a custom Playwright NPM package adopted by multiple teams to standardize and accelerate automation efforts across the organization.
- Integrated API automation within the framework using Axios for dynamic test data creation, cleanup, and validation, improving test reliability and reducing maintenance overhead.
- Pioneered UI Visual Regression Testing using Playwright, enabling pixel-perfect cross-browser and cross-device validations.
- Introduced Artillery for lightweight load testing and collaborated with performance teams on LoadRanger (JMeter-based) for advanced benchmarking and reporting.
- Owned CI/CD automation pipelines by writing custom YAML templates, scheduling automated runs, and embedding test suites into DevOps workflows for continuous quality validation.
- Championed best practices in automation, cross-functional collaboration, and test strategy alignment across UI, API, and performance testing domains.

Jun 2024 - Oct 2024

Technical Lead

Cigniti Technologies (Bengaluru)

Leadership in quality assurance strategy development and team management

- Mentored and guided a team of 5 QA engineers, promoting professional development and a culture of continuous improvement

Technical Skills

Cypress

Playwright

WebdriverIO

NightwatchJS

JavaScript

Typescript

Core Java

TestCafe

Protractor

Git

JIRA

ADO

Postman

AXIOS

Karate Framework

BDD Cucumber

SQL

Jenkins

MacOS-Windows-Ubuntu

Teamwork

Leadership

Problem-solving

Core Competencies

Automation Testing

Functional Manual Testing

Agile Principals

- Devised and executed quality assurance strategies to align with company goals and ensure product excellence
- Managed QA processes, proactively addressing risks and ensuring the delivery of outstanding outcomes
- Developed automation frameworks with Cypress and JavaScript to enhance testing efficiency
- Compiled and delivered monthly quality metrics reports to stakeholders
- Identified quality risks and formulated mitigation strategies to avert significant defects

Achievements:

Successfully prevented 3 major bugs within a month

May 2023 - Jun 2024

Lead Quality Engineer

Jeeves

Leadership in fostering a culture of continuous improvement and innovation

- Led and trained a team of 6 QA engineers, encouraging innovation and skill advancement
- Established quality assurance strategies that complemented the company's objectives
- Administered the QA process, identifying and mitigating potential risks
- Designed automation frameworks that improved testing processes and efficiency
- Coordinated with product managers to ensure quality goals supported product development
- Provided monthly quality metrics reports to stakeholders, enhancing engagement
- Communicated quality risks and preventive strategies, reducing major bugs significantly

Achievements:

- Increased test case coverage by 90%
- Reduced manual testing time by 75%
- Improved product feature delivery on time and within budget by 95%
- Prevented 18 major bugs within a year

Feb 2023 - May 2023

Lead Quality Engineer

SMC2

Leadership in quality initiatives and team development

- Elevated team productivity by 90% through process optimization
- Enhanced team satisfaction via targeted coaching and developmental opportunities

Achievements:

- Achieved a 15% improvement in testing efficiency
- Reduced manual testing time by 65%

Sep 2022 - Feb 2023

Sr SDET

MSys Technologies, India

Expertise in API and UI test automation and integration with CI/CD pipelines

- Developed and maintained automated API tests with TypeScript, Cypress, and Axios
- Designed comprehensive test cases for varied API functionalities
- Integrated API tests with the CI/CD pipeline for seamless deployment
- Collaborated closely with developers to assure API quality and compliance with specifications
- Constructed and maintained automated UI tests using Cypress and TypeScript
- Utilized Page Object Model for test maintainability
- Optimized UI test scripts for performance and scalability
- Amplified API test coverage, resulting in fewer defects

Achievements:

- Increased API test coverage by 50%
- Reduced API-related defects by 10%

Mar 2021 - Sep 2022

Senior Software Engineer-I

Beckman Coulter, India

Apr 2020 - Mar 2021

Consultant - QA

TechChefs Software Pvt Ltd., India

Jun 2018 - Apr 2020

QA Engineer

Taazaa Tech Pvt Ltd., India

Oct 2015 - Jun 2018

Software Engineer

Verma Infocomm Pvt Ltd., India

Education

Bachelor of Engineering in Computer Science and Engineering

JSS Academy of Technical Education, Bangalore, India

(2011 - 2015)

Achievements

- Implemented an automation framework from scratch, leading to a 75% reduction in manual testing time and enhanced test efficiency.
- Recognized for outstanding contributions with multiple awards, including 'Going Above and Beyond' in 2021, and 'Star Performer of the Quarter' in 2019.
- Pat on the Back Award – Altimetrik India (Apr 2025)**
Recognized for setting high-quality testing standards and significantly boosting automated test coverage across all MWAP appshells. Led the integration of Playwright with TestRail and developed a reusable automation package now utilized across multiple teams, delivering substantial cross-team impact.

Projects

Onverity

- Implemented and migrated an automation framework from Cypress and JavaScript to Playwright with TypeScript.
- Provided monthly reports to stakeholders with key quality metrics and actionable insights.
- Identified potential quality risks and communicated mitigation strategies, preventing 3 major bugs within a month.

Jeeves

- Implemented an automation framework from scratch using cutting-edge technologies.
- Liaised with product managers to ensure quality goals aligned with the product roadmap.
- Provided monthly reports to stakeholders with key quality metrics and actionable insights.
- Identified potential quality risks and communicated mitigation strategies, preventing 18 major bugs within a year.

DxONE Insights Analytics

- Implemented an automation framework from scratch with Cypress and JavaScript.
- Provided monthly reports to stakeholders with key quality metrics and actionable insights.
- Identified potential quality risks and communicated mitigation strategies, preventing 3 major bugs within a month.

MWAP

- Set high-quality testing standards across MWAP Appshells, enhancing overall automation practices.
- Increased automated test coverage significantly, improving release confidence and reducing defects.
- Integrated Playwright with TestRail, enabling seamless test management and reporting.
- Developed a reusable automation package adopted by multiple teams, accelerating automation adoption and consistency.
- Delivered cross-team impact by standardizing frameworks and improving collaboration.

Hobbies

Exploring new software technologies, Participating in coding challenges, Analytical problem-solving through puzzles, Contributing to open-source projects
