

SUMMARY

- Results-oriented Automation Testing professional with over 8 years of expertise in driving quality analysis, software testing, and automation testing initiatives within the IT industry.
- Adept at developing and executing comprehensive test plans, test cases, and testing methodologies, ensuring the delivery of high-quality products and services.
- Extensive experience in the Defect/QA Life Cycle, Software Test Life Cycle, Automation Testing, Manual Testing, and Agile (Scrum) methodologies.
- Specialized in Black Box testing encompassing functionality, integration, system, regression, sanity, and smoke, UAT, and API testing techniques.
- Performance-driven leader, successfully managed 4 direct and 13 indirect team members and collaborated seamlessly with cross-functional teams to analyze project requirements, define test automation strategies, and implement continuous integration and continuous deployment (CI/CD) pipelines for automated testing.
- Demonstrated ability to identify/report defects, track issues, and work collaboratively with developers to ensure timely resolution.
- Proficient in developing and maintaining E2E test suites, showcasing a commitment to thorough and effective testing practices.
- Technical well-versed with JavaScript and TypeScript as well as API testing using tools like Postman or similar.
- Ability to rapidly learn new languages, tools, and techniques to meet project requirements, and work collaboratively in teams and independently with minimal instruction.

KEY ACCOLADES

- ✓ Attained an award as "Going Above and Beyond" for recognition of best performance – 2021.
- ✓ Received ACE of Initiative Award, 2019 - 2020.
- ✓ Won Star Performer of the Quarter Award, 2019.

CORE COMPETENCIES

Functional Skills:

- | | | |
|------------------------------------|-------------------------------|----------------------------------|
| • Software Testing Life Cycle | • Defect & QA Life Cycle | • Client Relationship Management |
| • Project Management | • Manual & Automation Testing | • Product Release Support |
| • Requirement Gathering & Analysis | • User Acceptance Testing | • Leadership & Team Building |
| • Test Strategy & Planning | • Performance Test Monitoring | • Team Management |

Technical Skills:

- | | |
|----------------------------|---|
| Languages: | JavaScript, Core Java |
| Testing Tools/ Technology: | NightwatchJS, CypressIO, WebdriverIO, TestCafe, Protractor, Selenium, PlayrightJS |
| Tools: | GitHub, JIRA, TFS, BitBucket, Maven, Postman, AXIOS, KNIME Workflow, Linear, Notion |
| Framework: | POM, BDD (Cucumber), Mocha |
| Database: | MySQL |
| CI: | Jenkins |
| IDE: | Selenium IDE, Eclipse, Katalon Studio, VSCode, Visual Studio |
| Operating Systems: | MacOS, Windows 10, Ubuntu |

PROFESSIONAL EXPERIENCE

Lead Quality Engineer | Jeeves

May 2023 - Till Date

- Lead a high-performing team of 6 QA engineers, fostering collaboration, growth, and development. Mentor team members, providing guidance, training, and support to elevate their skills and expertise. Cultivate a culture of innovation and continuous improvement within the QA team. Develop and implement comprehensive quality assurance strategies aligned with the company's vision and goals. Oversee the entire quality assurance process, identifying and addressing potential risks and issues. Design and implement cutting-edge automation frameworks to streamline testing processes and enhance efficiency.
- Implemented an automation framework from scratch using cutting-edge technologies, resulting in a 90% increase in test case coverage and a 75% reduction in manual testing time.
 - Liaised with product managers to ensure quality goals aligned with the product roadmap, resulting in a 95% increase in product features delivered on time and within budget.

- Provided monthly reports to stakeholders with key quality metrics and actionable insights, leading to an 80% improvement in stakeholder engagement.
- Identified potential quality risks and communicated mitigation strategies, preventing 18 major bugs within a year.

Lead Quality Engineer | SMC2**Feb 2023 - May 2023**

Led and motivated a team of 3 QA professionals and achieved a team productivity increase of 90% through improved processes and communication. Elevated team member satisfaction to a 4.5 out of 5 rating through coaching and development opportunities. Increased team's automation expertise by 100% through training programs focused on cutting-edge technologies. Oversaw and reshaped quality initiatives and reduced critical bugs identified in production by 60% by aligning initiatives with company vision and goals.

- Improved customer satisfaction with product quality by 10 points and contributed to a measurable impact on key metrics by ensuring quality initiatives supported business objectives.
- Overhauled the quality assurance strategy to align with the company vision, leading to a 75% reduction in customer support tickets related to bugs.
- Championed the development and implementation of an automation framework using cutting-edge technologies, resulting in a 15% improvement in testing efficiency and a 65% decrease in manual testing time.

Sr SDET | MSys Technologies, India**Sep 2022 - Feb 2023**

Developed and maintained automated API tests using TypeScript, Cypress, and Axios. Designed test cases to cover various API functionalities. Integrated API tests with CI/CD pipeline for continuous integration and delivery. Analyzed test results, identified, and diagnosed API issues, and reported them to developers. Collaborated with API developers to ensure API quality and adherence to specifications.

- Developed and maintained automated UI tests using Cypress and TypeScript. Designed test cases covering various UI elements, user flows, and functionalities. Utilized Page Object Model (POM) design pattern for efficient and maintainable tests.
- Automated UI interactions, handled different UI frameworks and libraries, and optimized test scripts for performance and scalability
- Increased API test coverage by 50%, leading to a 10% reduction in API-related defects.

Senior Software Engineer-I | Beckman Coulter, India**Mar 2021 – Sep 2022****Key Projects Delivered:****Project #1:** DxONE Insights Analytics | **Role:** QA –Automation | **Mar 2021 - Present****Client:** Direct Customer Facing - Product | **Team Size:** 9 (Scrum Team)

Performed a wide range of activities, including creating, updating, and modifying new scripts as well as developing test protocols. Carried out API Testing on Postman, and KNIME Workflows with DB Testing. Acted as a SPOC between developers and the QA team to develop effective strategies and test plans. Prepared clear, concise, and comprehensive test plans and test cases. Evaluate test results, report defects, and resolve the issue using a defect life cycle. Designed a new automation suite for the internationalization of the application and verify the activities for Canada, Spain, Germany, Italy, and China releases.

- Spearheaded a team of 4-automation and functional verification engineers to attain the sprint goal.
- **Technologies Used:** NightwatchJS, JavaScript, TFS, Page Objects, Jenkins, Postman, KNIME Workflow, and Database Testing.

Consultant - QA | TechChefs Software Pvt Ltd., India**Apr 2020 - Mar 2021****Key Projects Delivered:****Project #1:** DxONE Insights Analytics | **Role:** QA –Automation | **Apr 2020 - Mar 2021****Client:** Beckman Coulter | **Size:** 9 (Scrum Team)

Created all the new tests required as per the features. Designed and implemented test plans, test cases, and test matrices by utilizing QA best practices and standards. Defined automation plans to support new product launches and business efficiency tools. Developed and executed an automation framework for multiple platforms and devices. Initiated automation projects and performed research on new tools and techniques for test automation. Examined the automation work done by the multiple engineers in the team.

- Effectively redesigned the whole regression and functional automation suite, which had been ineffective for the previous 3-years.
- Received a full-time job offer from the client after working there as a contractor.

- **Technologies Used:** NightwatchJS, JavaScript, TFS, Page Objects, Jenkins

QA Engineer | Taazaa Tech Pvt Ltd., India**Jun 2018 - Apr 2020****Key Projects Delivered:****Project #1:** Starfish | **Role:** QA –Automation & Integration Testing | **Mar 2019 – Apr 2020****Client:** Hobsons-Virginia, USA | **Team Size:** 11 (Scrum Team)

Designed test automation framework, test scripts and test harness and applied the latest techniques in test automation. Collaborated with the developers to analyze the requirements and maintain the continuity of the Automation Suite. Supported the team to configure Jenkins Job and developed a Pipeline.

- Successfully created a CI Pipeline on Jenkins from Dev to QA.
- Instrumental in performing accessibility testing from JAWS Screen Reader.
- Efficiently worked on multiple POC to identify the best tool from Testcafe and Cypress.
- **Technologies Used:** WebdriverIO, JavaScript, SauceLabs, Jenkins, GitHub, Page Objects, PostgreSQL.

Project #2: Solviant | **Jun 2018 – Jan 2019****Role:** QA – Automation | **Team Size:** 9 members

Analyzed system specifications and software quality by performing manual and automation testing. Coordinated with QA Engineers to design effective strategies and test plans. Implemented manual/automation test cases. Assessed product code as per the specifications. Prepared logs to document testing phases and defects. Identified and reported bugs and glitches and updated the development team. Assisted in troubleshooting the issues.

- Delivered the highest quality of projects to the client in adherence to time, budget, and organizational norms.
- **Technologies Used:** Cypress, JavaScript, GitHub, POM.

PRIOR EXPERIENCE

Software Engineer | Verma Infocomm Pvt Ltd., India**Oct 2015 - Jun 2018****Key Projects Delivered:****Project #1:** People Management & Payroll System | **Feb 2017 - Jun 2018****Role:** Tester | **Team Size:** 6**Technologies Used:** Selenium WebDriver, TestNG, Java, SQL, JIRA, Maven, GitHub, POM**Project #2:** Bank Master | **Jun 2016 - Jan 2017****Role:** Tester | **Team Size:** 5**Technologies Used:** Java, Selenium, Browser, TestNG, POM, Maven, GitHub**Project #3:** e-Attendance based System | **Jun 2015 - May 2016****Role:** Manual Tester | **Team Size:** 5**Technologies Used:** Manual Testing, Browser, Excel

SCHOLASTIC & ACCREDITATION

Bachelor of Engineering in Computer Science and Engineering | JSS Academy of Technical Education, Bangalore, India – 2015.**Training:** Agile Training, JavaScript Training, Cypress Training, and TestCafe Training.**Certifications:** AWS Cloud Practitioner Certification from UDEMY – 2021.
